Profile

Software Engineering student aspiring to work as an Associate Software Engineer with strong fundamentals in **C++, Java, Spring Boot, Python, SQL, and web technologies**. Experienced in developing backend and full-stack applications, designing and integrating RESTful APIs, implementing role-based access control, and working with relational databases. Skilled in problem solving, data structures, and writing clean, maintainable code. Eager to contribute to a professional software development team and learn industry best practices while building scalable applications.

Skills

CPP, Java, Python, SQL, Spring Boot, Salesforce (Apex, Lightning), REST APIs, MySQL, Cloud Applications, Data Integration, HTML, CSS, JavaScript, Git, GitHub, SDLC, Data Structures, Client-Server Architecture, Problem Solving, Team Collaboration

Experience

FullStack Web Development Intern – VisionAstra Ev Academy Feb 2026 – May 2026

- Developed responsive web pages using HTML, CSS and JavaScript for business applications.
- During the internship, a hands-on project was completed, demonstrating strong problem-solving skills.
- Developed a Ev Trip Planner with Battery usage calculation and weather API.

Projects

Online Voting System (C++, HTML, CSS, JavaScript) 2025 – 2026

- Developed a web-based voting system with a **C++ backend server** and frontend UI for voters and admin.
- Implemented **login authentication** for Admin and Voter modules, candidate listing, and secure vote casting.

Hand Gesture Control System (Python, MediaPipe, Arduino) 2024 – 2025

- Developed a real-time computer vision system to detect hand gestures from webcam video streams.
- Hand landmarks extracted and gestures mapped to hardware control commands via Arduino integration.

UniJourney – Student Database System (Spring Boot, MySQL) 2025 – 2026

- Built a Spring Boot and MySQL based student management system handling 1,000+ records with secure REST APIs.
- Implemented QR-based certificate verification reducing manual validation and improving data authenticity.
- Designed role-based access control to support admin, staff, and student workflows.

Weather Forecasting System (Salesforce, REST API) 2024 – 2025

- Built a Salesforce Lightning dashboard integrating OpenWeatherMap REST API via Apex callouts.
- Designed cloud-based data flow between external APIs and Salesforce objects for real-time updates.

Education

B.E. Information Science Engineering – KLS Gogte Institute of Technology 2022–2026 CGPA: 6.94 / 10
Relevant Coursework: Data Structures, Database Management Systems, Software Engineering, Web Technologies
Senior Secondary (XII) Science – Vivekanand College, Kolhapur 2022 65.83%
Secondary (X) – Usharaje High School, Kolhapur 2020 91.80%

Certifications

Cloud Computing – NPTEL (IIT) — Introduction to Internet of Things – NPTEL (IIT)

Languages

English, Hindi, Marathi, Kannada
